

Nutrient management strategies for regional ecosystems across Europe

Re-balancing nutrient flows to tackle climate change and biodiversity loss

The solution

A regionally tailored, cross-sectoral approach to nutrient balance

GREENHOOD Demo Regions

The potential of innovative nutrient management strategies will be showcased in the following 4 unbalanced regions:

Ebro River Basin, Spain

Rhine, Meuse & Scheldt Basins, Belgium & the Netherlands

Archipelago Sea Basin, Finland

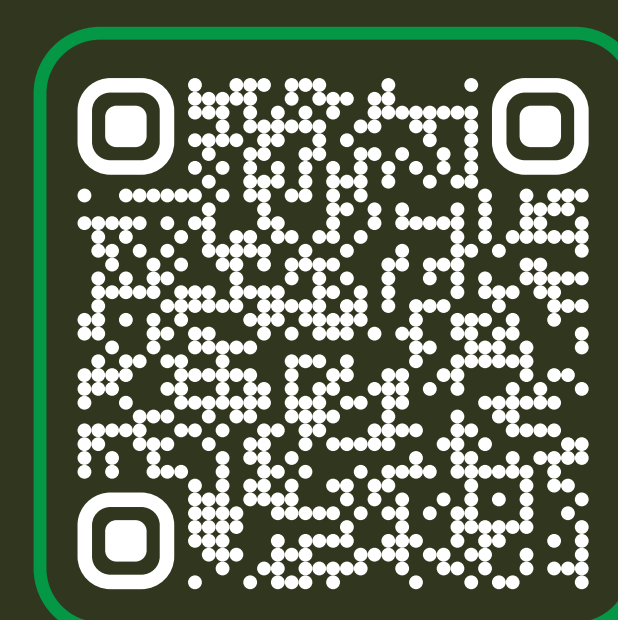

Trondheim Fjord Basin, Norway

The goals
